

Thank you for taking our opinions on this very important matter.
I know Airl has affected many people I know. Airl Plays positive music and displays an atmosphere of brotherly love not common in today's radio broadcasts. If the switch to LPFM is made we will lose Airl in my local area. We need a positive change in today's music and to make a switch would massive change the radiowave scene and take a very positive and helpful radio station off the air. Many of my friends find it a relaxing change from the fast pace negative music so common on today's radiowaves. Please do not make the switch.

The effect on the community would be drastic. As I stated before we would lose an amazingly popular radio station that emits a positive light.

Airl gives me an uplifting change and brightens my day and puts me at peace with the world. It encourages me to be a kind person and love my neighbor. Which is a message that doesn't hit the radio anymore.

So please consider the changing to LPFM would severely alter the course of many people's lives and affect millions around the country. This change would take away a major source of positive music from the country. Please do change.

We need MORE stations like Airl with clean and positive music out there!!!

Thank you
